

SANJEEVI GOPALAKRISHNAN

Application Developer | Flutter | AWS | Node.js

sanjeevigopalvijaya47@gmail.com | +91 8248658049 | Tiruppur, Tamil Nadu, India
Portfolio | LinkedIn | GitHub | Dono Books - Google Play

PROFESSIONAL SUMMARY

MCA candidate with practical experience in **Flutter, Dart, Node.js, REST APIs, PostgreSQL, Firebase, MongoDB, and AWS**. Built mobile and web applications, worked on API integration and database operations, and handled application deployment and troubleshooting. Also familiar with **Linux, Git, Terraform, networking fundamentals, cloud services, and CI/CD practices**.

TECHNICAL SKILLS

Programming: Dart, Python, JavaScript, SQL

Mobile Development: Flutter, Android, Material Design, Responsive UI/UX

State Management: GetX, Provider, BLoC

Backend Development: Node.js, Express.js, REST APIs, JSON, Socket.IO, Cloud Functions

Databases: PostgreSQL, MongoDB, MySQL, Firebase Firestore

Cloud & DevOps: AWS, EC2, S3, IAM, VPC, Security Groups, Terraform, Git, GitHub

Operating Systems & Networking: Linux, Shell Scripting, TCP/IP, IPv4 Subnetting, VLAN

Tools: Android Studio, Visual Studio Code, Postman, Jira, Cisco Packet Tracer

PROFESSIONAL EXPERIENCE

Mithra Home Tech Pvt. Ltd. — Full Stack Developer (Part Time)

Jul 2025 – Present

- Built Android and web applications using Flutter and Dart, working on UI development, state management, REST API integration, and backend connectivity.
- Worked with PostgreSQL and AWS for database operations, application deployment, configuration, and troubleshooting.

Coreverse Technologies — Flutter Intern

Sep 2025 – Feb 2026

- Built and maintained 2 Flutter and Firebase applications, working on application screens, responsive UI, local data storage, and Firebase synchronization.
- Fixed application issues, generated Android App Bundles, and assisted with application releases through Google Play Console.

Lights Inc — Team Lead Intern

Jun 2025 – Nov 2025

- Led a team of 5 interns and handled task allocation, sprint planning, Git-based development, code reviews, issue tracking, and project coordination.

PROJECTS

Dono Books — Business Management Application

Flutter, Firebase

- Developed and published a business management application for managing **sales transactions, inventory, and business records**.
- Used **Flutter and Firebase** to build application screens, store business data, and keep information synchronized.

Cross-Account AWS Automation — Personal Practice Project *AWS Lambda, IAM, STS, EC2, CloudTrail, Python, Boto3*

- Built a cross-account AWS automation project as a **personal practice project** to understand secure access between AWS accounts.
- Configured **IAM trust relationships and STS AssumeRole** for temporary cross-account access and used **Lambda and Boto3** to control EC2 resources.

Lights On — Finance Management Application

React Native, Node.js, MongoDB

- Developed a finance management application for tracking **expenses, transactions, financial goals, and mutual fund investments**.
- Connected the React Native application with **Node.js and MongoDB** services for user authentication and storing financial data.

Attendance Tracker System

Flutter, GetX, Firebase, Geolocation

- Developed a GPS-based attendance and payroll application for managing **employee check-in/check-out, attendance records, leave, and payroll information**.
- Used **Flutter, GetX, Firebase, and geolocation** to handle attendance tracking and employee-related data.

Mithra Tech — Technician Service Booking Platform

Flutter, GetX, PostgreSQL, AWS

- Developed a service booking application where customers can **schedule installation, repair, and maintenance services**.
- Developed a separate technician application to **view service requests, accept bookings, update job status, and manage assigned tasks**.

EDUCATION

Master of Computer Applications (MCA) — Kongu Engineering College

2024 – 2026

Bachelor of Computer Applications (BCA) — Nandha Arts and Science College

2021 – 2024

CERTIFICATIONS & TRAINING

Besant Technologies — Cloud Master Program: AWS Cloud, Linux Administration, CCNA Networking, Python, DevOps Tooling — In Progress

GitHub Foundations: Verified credential in Git and repository workflows
